

Study in France Webinar

IMT NORD EUROPE

Join us to hear all about the Master's degrees that combine engineering and management!

IMT Nord Europe is part of the IMT network of engineering and management schools all focus on training for the business world, developing the economy and regions, and contributing to innovation and entrepreneurship. The IMT network aims to respond to the digital, industrial, energy and educational challenges of the 21st century.

Some of the issues that IMT Nord Europe works on include the smart city, the health and autonomy of people and the industry of the future. IMT Nord Europe has 3 fields of excellence that are at the core of all of their programmes: digital systems, eco-materials, civil engineering and Industry.

IMT Nord Europe specialises in a range of fields, including environment, energy, digital technology, civil engineering, industrial engineering, cybersecurity and AI.

Topics to be covered

- Introduction to the French higher education system
- The France – South Africa Scholarship Programme
- IMT Nord Europe's opportunities for international students
